Information systems technology

Universidad del Valle

2017 - 2021

- Learned programming fundamentals, which ignited my passion for software development and shaped my career path.
- Improved communication and teamwork skills through academic projects and presentations.

LANGUAGES

Spanish - Native

English - Fluent

PROFILE

Full Stack Developer with +4 years of experience in Frontend development: building responsive, user-focused web applications using modern technologies like React and Angular. Proficient in creating UI/UX designs that enhance customer engagement and satisfaction. Recently expanded into Full Stack development with approximately 1 year of experience working with Node.js, Express.js and MySQL, delivering end-to-end solutions. Skilled in problem-solving, agile development, and team collaboration, with a strong commitment to delivering high-quality, scalable, and maintainable code.

WORK EXPERIENCE

Software Developer

Konecta Colombia

December 2021 - currently

- Designed and developed internal applications to enhance the efficiency and productivity of call center agents, improving task completion speed by optimizing workflows.
- Built responsive and user-friendly interfaces using React and Angular, ensuring seamless user experiences across devices.
- Implemented server-side functionality with Node.js and Express, enabling and scalable back-end services.
- Collaborated with cross-functional teams to gather requirements, define project scopes, and deliver high-quality solutions within tight deadlines.
- Streamlined internal processes by integrating APIs and third-party tools, reducing manual tasks and enhancing system performance.

Junior Frontend Developer

Catenaria LTDA

August 2020 - December 2021

- Planned, developed, and maintained web applications to empower external clients to market and sell their services effectively.
- Designed and implemented dynamic user interfaces using Angular, ensuring high performance and responsiveness.
- Integrated APIs to enable seamless data exchange between systems, enhancing functionality and user experience.
- Collaborated with a short team to define project scopes, plan development timelines, and align deliverables with client needs.
- Conducted regular maintenance and optimization of existing applications, reducing downtime and improving system reliability.
- Enhanced usability and accessibility through iterative improvements based on user feedback and performance analysis.
